

Please support HB 5107 which is a refinement of the bill overwhelmingly passed in 2018 though it falls woefully short of protections regarding tethering and required shelter but at least will bring us in parity with more progressive states in the country regarding protections of pet dogs. We can do better! Please support this bill to secure my vote for you in future elections and our to give Animal control officers and police what they need to enforce laws that deter inhumane treatment of our pets.

Thank you,
